## Fine Arts Printing Services

Please fill out this separate Printing Form if using our Fine Arts Printing Service. Mpls Photo Center provides exhibitors the option of sending their work for printing using our Fine Arts Printing. If you are using our printing services, please fill out the this form and have back to us with your by file by **December 29th 2017**

### The cost of printing is:

10¢ per square inch for Standard Resin Coated Photo Luster

15¢ per square inch for Premium Exhibition Photo Baryta

Prices calculated on the media size necessary to print and frame. If choosing our Fine Art Printing Services, please provide us with a 300 dpi (final image size) tiff. We recommend tiff files for the best color and b&w print reproduction.

*Exhibition Photo Baryta 310gsm is a pure white 100% Barium Sulphate surface coated Fourdrinier photographic base paper combined with Crystal Layer inkjet coating technology that ensures you can now reproduce your photographic artwork on exactly the same paper used in traditional Silver Halide printing.*

*Standard Resin Coated Photo Luster is a high white resin coated photo paper that has a slightly stippled lustre surface. Ideal for prints where you want the impact of gloss but with a slightly softer feel.*

*Printing prices calculated on media size necessary to print. Your requested image size, i.e., 16x20 would use 18x24 paper*
